Overview

Applies accounting principles that include work that is analytical, creative, evaluative, and advisory in nature and that require an understanding of both accounting theory and practice.

Typical Functions

The work draws upon and requires a thorough knowledge of the fundamental doctrines, theories, principles, and terminology of accountancy, and often entails some understanding of such related fields as business law, statistics, and general management.

Analyzes the effects of transactions upon account relationships.

Evaluates alternative means of treating transactions.

Plans the manner in which account structures should be developed or modified.

Ensures the adequacy of the accounting system as the basis for reporting to management.

Considers the need for new or changed controls.

Projects accounting data to show the effects of proposed plans on capital investments, income, cash position, and overall financial condition.

Interprets the meaning of accounting records, reports, and statements.

Advises operating officials on accounting matters.

Excludes paraprofessional accountants.

At the fully competent level may lead and coordinate activities of other lower level accountants, paraprofessionals, and/or clerical workers performing accounting and bookkeeping tasks.

Requires a bachelor's degree in accounting.
